For the upcoming fall semester 2014 we have scheduled several sections of the special topics courses ISE589, ISE789, and ISE794. In this seminar the instructor for each section gives a brief description of the course content and answers related questions. This is a great way to learn about the special topics courses before you make your course selection for Fall semester 2014.

The following special topics course will be discussed in this session:

ISE 789-001  Quality Control in Pharmaceutical Industry  Dr. Tom Culbreth
ISE 789-002  Advanced Nanomanufacturing  Dr. Jingyan Dong
ISE 589-001  Introduction to Medical Device design  Dr. Ola Harrysson
ISE 589-004  Additive and Advanced Manufacturing  Dr. Ola Harrysson
ISE 589-006  Biomedical Design and Manufacturing  Dr. Rohan Shirwaiker

Refreshments will be served in Daniels Hall Room 401 starting at 11:00 a.m. to 11:30 a.m.
